

## REACH Declaration of Conformity

To whom it may concern,

The WAREMA Renkhoff Group hereby confirms conformity with the European chemicals regulation REACH. In this regulation, we see ourselves as a "downstream user" and are aware of the resulting obligations.

The recommended risk reduction measures, which we receive from our suppliers via safety data sheets, are continuously integrated into our production process.

We fulfill our duty to provide information to our suppliers and customers. We pass on all information on handling hazardous materials that we receive from our suppliers and that is relevant to our customers.

The plastic granulates processed in our Plastic Moulding Department are generally not subject registration according to the REACH regulation.

Furthermore, we check the intended use in the safety data sheets of our preparations and will contact our suppliers in case of deviations.

In terms of REACH, our products are considered to be manufactured products and substances exceeding one ton are not intentionally released.

If our products contain substances from the currently valid list of candidates for approval in a mass fraction of more than 0.1%, we will publish them under the following link on our website

If substances of the currently valid Approval Candidate List are contained in our products in a mass percentage above 0.1 %, we publish them under the following link on our homepage ([warema.com/en/company/reach.php](http://warema.com/en/company/reach.php)).

To secure our supply chain and in the interests of maximum product safety, we demand and pursue the implementation of REACH also on the side of our suppliers. The assurance of REACH conformity is part of our supplier qualification. Our suppliers have informed us that they are working on the implementation of the REACH regulation and that their product range will be retained.

If you have any questions, please contact our REACH expert, Mr. Martin Zehner, under +49 9391 20-6030.

Yours sincerely
