

# Surfing the sun

Sonea – The new generation sun sail.

Der SonnenLichtManager

## Surfing the sun

Sonea – The new generation sun sail.

The new generation sun sail Sonea is here. With a more spectacular design than ever before. With many optimised features for extreme stability and longevity. And with an ease of operation that makes it fun to use. Experience the interplay of sun, light and shade. Set accents that lend a new lightness to the garden, patio and architecture. And above all, you can look forward to the most beautiful fascination.

Surfing the sun

*We like to  
live sponta-  
neously*

We do of course have a beautiful modern living room, but we are drawn to the outdoors. When we are able to feel the wind, breathe in the fresh air and our friends spontaneously call by, it makes for a perfect day. We love to chat about life, sport, travel or we just enjoy each other's company.

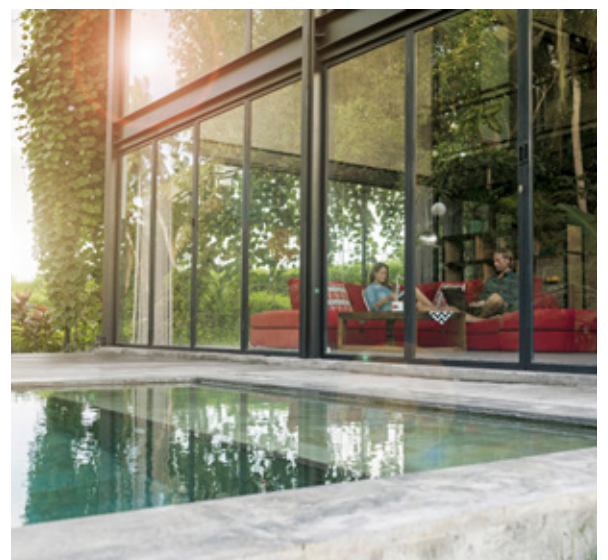

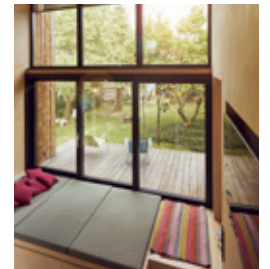

# S70

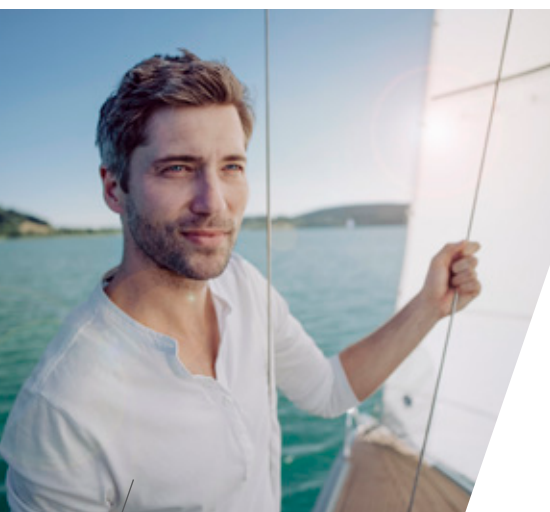

*Enjoy every moment properly.*

Our patio is at the heart of it all. Here, everything takes place under our huge Sonea sun sail which is attached to the wall of the house. And because there is always something going on at the patio, our Sonea with two extensions provides enough shade and distributes fresh air for everyone.

But it's not just the sun shading that we love about our sun sail. It also adds a special personal touch and certain brightness to the architecture of our home. Anyone who sees me extending the sail electrically for the first time is always surprised at the motor hidden within the fabric shaft. Sonea awakes enthusiasm and creates a unique holiday atmosphere.

We often spend the entire day in our outdoor space. It is very practical that the Sonea's pull-out posts are easily height-adjustable. This always allows us to adjust our sun sail according to the position of the sun. And when the day is over, the two of us enjoy a romantic evening together.

Surfing the sun

## *I love my independ- ence*

A house on the water with a patio on the shore. That is my dream of freedom that I have brought to life. I love natural materials and the simple things in life. Outside here, where you are in touch with the elements, is where you really feel their value.

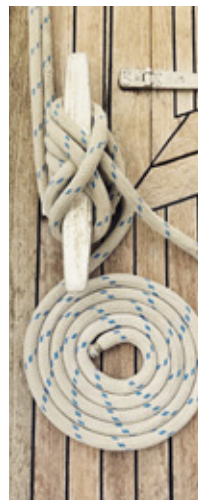

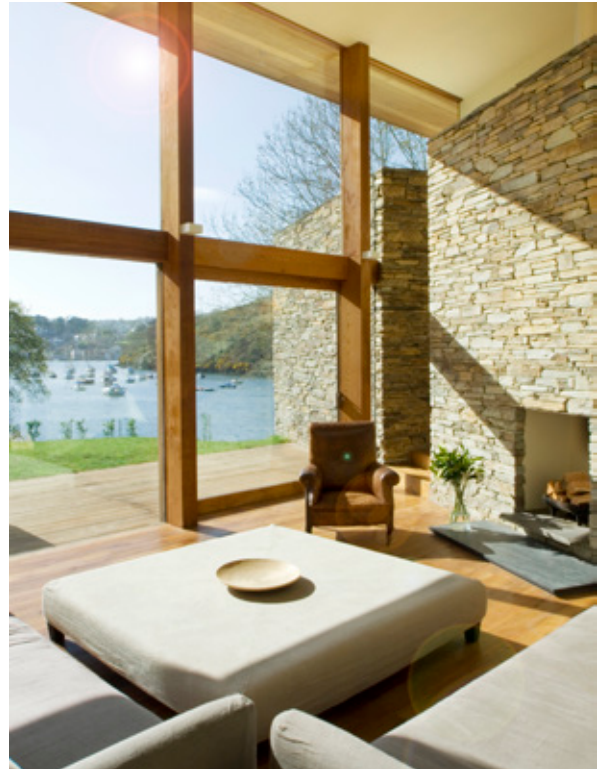

## S40, S50

*Quality is important to me.*

Whenever we are in our house by the lake, it becomes clear to us how little you actually need to be happy. Just a few select, beautiful things. But with quality that you can enjoy every day. The same goes for a good meal, for our furniture and for the design of our outdoor space. Because this is where we spend most of our time.

Above us, the sun shines in a bright blue sky. A pleasant breeze comes in off the lake. And we enjoy our shady and airy spot under the sun sail Sonea. The reflections of the water cast a fascinating light show on the underside of our sun sail.

With the convenient collapsible crank, I can easily raise my sun sail Sonea with a small amount of force. The stable, free-standing stainless steel poles in a simple design, the strong yet slender-looking cable and the robust fabric – all of these are materials that I can fully rely on. That is quality and design just as I like it.

S70

Sonea Technology

# The innovation is in the perfection.

The new generation of sun sails Sonea stands out with its innovative technologies and fundamental optimisations. The result: Sonea sets standards with its light and convenient operation, its stability and reliability and its design and customisation options.

The Sonea S40 and S50 models with collapsible crank drive and the Sonea S70 with the invisibly integrated electric drive are available to choose from.

The sun sails Sonea can be mounted to the wall of the house or installed completely free-standing. The Sonea models stand out thanks to its quality, reliable functionality and unique longevity.

The poles of the S70 have a special mechanism inside which provides high stability, rebound and thus optimal fabric tension.

Both in electric mode and with the manual crank, the Sonea is extremely smooth to open and close thanks to a sophisticated cable deflection system. All elements slide almost silently and without effort.

A special feature is the smart, convenient height adjustment. This means you can set the sun sail Sonea depending on the position of the sun for optimal shading or for wind protection.

Easy operation (electric or manual)

Mounted or free-standing

Reliable, durable quality

Height-adjustable

High-grade design element for the garden

Sonea S70

## S40, S50

1

### Pole

Made from aluminium, individually powder-coated in accordance with WAREMA Colour World. The poles are also available in stainless steel.

2

### Manual height adjustment

Optional height adjustment for the fabric's lowering mechanism offers protection when the sun is low.

3

### Variety of fabrics and colours

Large selection of high-grade acrylic fabric qualities (acrylic plain coloured) such as Standard/Lumera acrylic fabric and Perfora acrylic fabric.

4

### Motor drive

The motor drive in the S70 is hidden in the fabric shaft, fully invisible from the outside. The sail can be easily controlled by motor and hand-held transmitter.

5

### Optional: Wall mounting

The sun sails Sonea can be fixed to the wall using wall consoles.

6

### WMS Weather station

The WMS Weather station causes the sun sail to retract automatically if the wind picks up or bad weather sets in – this means your fabric is always safely protected.

7

### Crank connection with cable winder

The convenient crank operation makes for self-sufficient operation of the S40 and S50 sail at any time. Be fully independent of a power supply.

8

### Fabric shape

Different fabric shapes like symmetrical, asymmetrical or triangular are available.

Sonea

# The Features

## Poles in stainless steel or powder-coated

All poles are available in stainless steel or with powder coating from the extensive WAREMA Colour World. You can choose from the three colour categories "Highlight", "Variation" or "Individual".

S40    S50    S70

•        •        •

## The extensive WAREMA fabric collection

A wide range of high-grade acrylic fabrics are available to you for all Sonea models. The acrylic fabrics from WAREMA fulfil the most demanding quality requirements and offer you a great selection of modern uni-coloured designs.

S40    S50    S70

•        •        •

## A wide selection of fabric shapes

With WAREMA, you will always find the sun sail Sonea that is guaranteed to fit in with your individual architecture. Choose between symmetric, asymmetric or triangular fabrics.

S40    S50    S70

–        •        •

## Free-standing or installed on the house wall

You can also freely choose the place to use your sun sail Sonea. Would you prefer it to be installed free-standing or have it mounted to the outer facade of your house? Design-wise, you have all the options here.

S40    S50    S70

•        •        •

## Convenient height adjustment

You can combine the Sonea models with a convenient height adjustment function. This way you can lower your sun sail easily on one side – ideal when the sun is low.

S40    S50    S70

•        •        •

## Perfect motor integration

In the S70, the motor is fully hidden and therefore completely invisible.

### WMS Weather station

You can combine your sun sail Sonea S70 with the WMS Weather station. This allows your sun sail to be raised and lowered automatically depending on the weather situation. It is thus also protected from storms or bad weather.

S40   S50   S70

-   -   ●

### Convenient single-point operation with crank drive

The S40 and S50 models are equipped with a unique, convenient single-point operation. This means you can retract and extend the sun sail from one place with minimal effort using the crank drive.

S40   S50   S70

●   ●   -

### Radial fabric cut

The extravagant, radial fabric cut makes the sun sail Sonea a design highlight in your garden.

S40   S50   S70

-   ●   ●

### Protective cover

Over the winter months, the fabric can be protected against wind and weather in a special Sonea protective cover. This ensures it looks radiant again in the summer.
